

Volatility Viewer

Copyright © 2007, Pavel Mison

1) Basic Idea

Volatility Viewer is a tool for displaying price and volatility charts for different underlying. This tool lets you display both charts in one window with cross hair for better finding of correlation between price and volatility.

There is also possibility to use different time frames, what you like and prefer.

2) Tutorial

In the first step you have to pick the group of tickers (*Menu*) and then list of tickers appears under menu. You choose ticker from *SubMenu*.

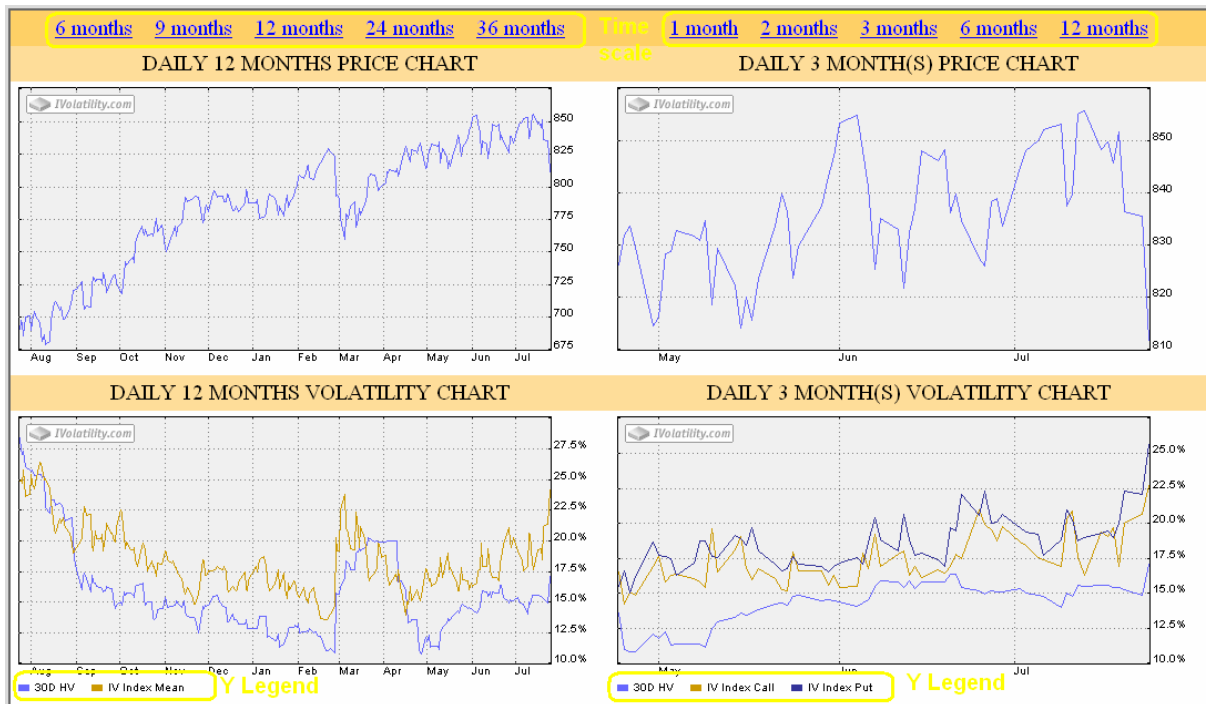

On top of the main screen you will find head with *Identification of Ticker*, *Date of Coming Earnings* (if available) and direct *Link* to www.earning.com.

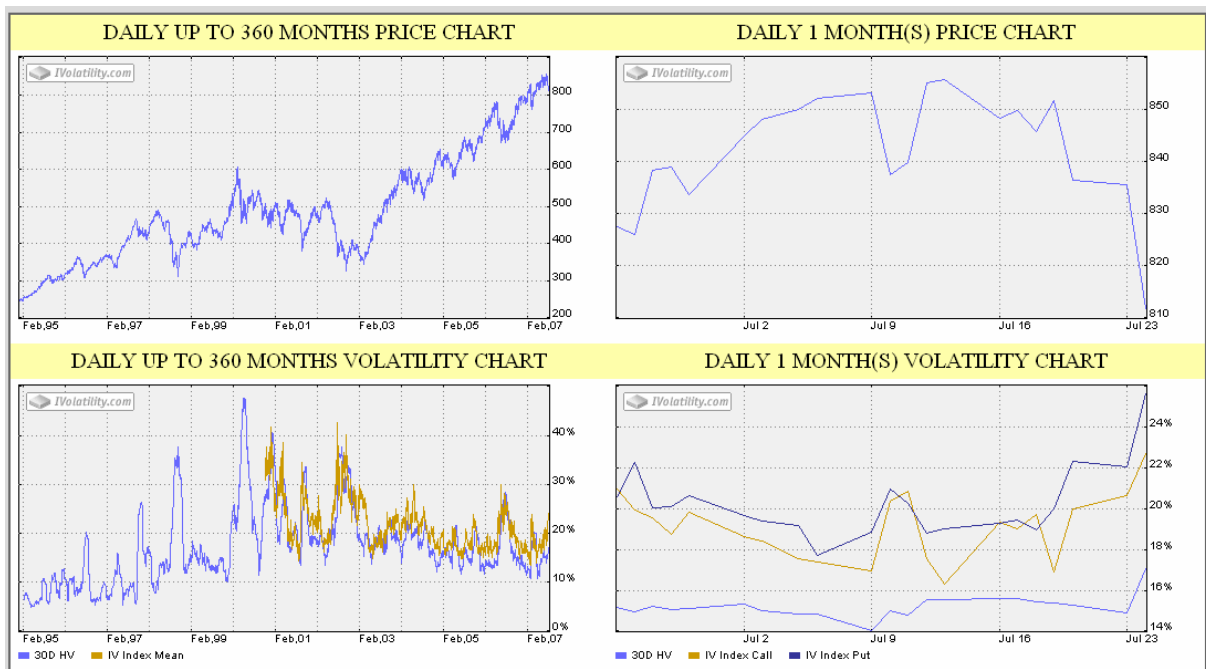

Main screen consist of 4 sections, each of them has price and volatility chart based on the same time frame.

Two upper sections are time scaleable. You can change the time frame by clicking on *Time scale* menu above charts. Left part has longer time frames and IV Index Mean (*Y Legend*). Right part of screen has shorter time frames and IV Index Call and Put separately (*Y Legend*).

Two bottom sections have fixed time frame (up to 30 years – if the data are available and 1 month).

After clicking on image you get zoomed one. Again click on image closes the zoomed window and return you back to previous screen.

On top of that, there is also large crosshair for better correlation between price and volatility charts and determination x/y values.

3) License

Except where otherwise noted, all of the documentation and information included in the Volatility Viewer is copyrighted by Pavel Mison.
